Webinar

on

“Cognitive Cloud Computing”

The Department of CSE organized a Webinar on 20.07.2020 between 11.00 AM and 1.00 PM. The webinar was convened by Dr.S.A.Sahaaya Arul Mary, HoD/CSE and coordinated by Ms.V.Punitha , Dr.N.Kavitha and Ms.J.SathiaParkavi.

Dr. N. Renugadevi, Assistant Professor, Indian Institute of Information Technology, Trichy, presented a webinar session on “**Cognitive Cloud Computing**” to the webinar participants. The participants were students, faculty members, research scholars from colleges from different states in India. Totally 85 members have participated in this webinar and which in itself made this event a grand success. The main objective of this webinar was to impart in all participants the basics of cognitive cloud computing concepts and its field of application through various examples thus providing them with an opportunity to enhance their relevant skills and become strong in this technology. The Session started with the Introduction of Cognitive Cloud Computing and then explained how it has brought the power of next generation wireless networks to enterprises across the globe. She also covered about the Cryptographic Key Exchange and Encryption algorithms. Finally she took the participants on a virtual walk through the application areas of Cognitive Cloud Computing. Her clarifications of the various doubts raised by the participants made the session more interactive. She expressed her thanks to the Management, Principal Sir, HoD/CSE and faculty members for providing her this opportunity through this webinar to be among all these participants from various Institutions.

Dr. Syed Shahul Hameed

In Distributed GKM all the members are sharing their keys, but the centralized server has to combined all their keys and has to find a unique key for all members...in that case again the third party security issues comes

Dr. Syed Shahul Hameed

To get a high security in distributed GKM, shall we use the Blockchain concept?

“Modern Computer Architecture”

The Department of CSE organized a Webinar on 17.07.2020 between 10.00 AM and 12.00 noon. The webinar was convened by Dr.S.A.Sahaaya Arul Mary, HoD/CSE and coordinated by Mr.M.Anbazhagan and Mr.D.BoobalaMuralitharan.

Dr.S.Tamilarasan, Professor/CSE, BITS Dubai campus presented a webinar session on “**Modern Computer Architecture**” to the webinar participants. The participants were students, faculty members, research scholars from colleges from different states in India. Totally 85 members have participated in this webinar and which in itself made this event a grand success. The main objective of this webinar was to impart in all participants the need of modern computer architecture in this era and how it is utilized by various organization and developers all over the world and its field of application through various examples thus providing them with an opportunity to enhance their relevant skills. The Session started with the Introduction of types of architecture present and then explained how each and every architecture evolved over time. His clarifications of the various doubts raised by the participants made the session more interactive. He expressed her thanks to the Management, Principal Sir, HoD/CSE and faculty members for providing her this opportunity through this webinar to be among all these participants from various Institutions.

WEBINAR SERIES (DURING COVID 19 LOCKDOWN PERIOD)

Title of the webinar	INTRODUCTION TO TEXT MINING
Resource Person details	Mr.Xavier Babu, M.E.,M.B.A, (Ph.D) Senior Director in a cloud-based Digital Marketing Technology at Publicis Groupe, Boston, MA, US 20+ years of experience in I.T. industry
Date of webinar	16-July-2020
Duration	1 hour (4 – 5 pm IST)
No. of participants attended	87 (24 external participants +63 internal participants)
Medium of webinar	Online through Google meet

Minutes of the webinar

The resource person was introduced to the participants. The webinar started with the introductory topic of what is mining and terminologies used. Every day, we generate huge amounts of text online, creating vast quantities of data about what is happening in the world and what people think. All of this text data act as an invaluable resource that can be mined in order to generate meaningful business insights for analysts and organizations.

But analysing all of this content isn't easy, since converting text produced by people into structured information to analyse with a machine is a complex task. In recent years though, Natural Language Processing and Text Mining has become a lot more accessible to data scientists, analysts, and developers alike.

There is a massive amount of resources, code libraries, services, and APIs out there which can all help one embark on one's first NLP project. The speaker started from scratch by showing how to build a corpus of language data and how to analyse this text.

The process is to be divided into 3 steps. Each of these steps will do two things: show a core task that will get one familiar with NLP basics, and also introduce one to some common APIs and code libraries for each of the tasks. The tasks that are selected are:

1.Building a corpus — using Tweepy to gather sample text data from Twitter's API.

2.Analyzing text — analyzing the sentiment of a piece of text with our own SDK.

3.Visualizing results — how to use Pandas and matplotlib to see the results of one's work was a topic that was briefly covered. A demonstration of python code was executed which gave an insight into the topic of the webinar.

The webinar concluded by outlining research possibilities in the area of text mining. A feedback from the participants was also received on-line.

Text Mining and Related Fields

- **Text mining** is the process of discovering hidden patterns from unstructured text data.
- Text mining tasks include text representation, information/feature extraction, text clustering, text classification, and so on.
- Information Retrieval (IR) (e.g., search engine techniques) deals with the problem of finding relevant text documents with respect to the user input but does not explicitly address the problem of discovering patterns. So, IR is closely related to text mining, particularly in the data preprocessing stage, but IR is not equivalent to text mining.

Text Processing (Tokenization)

Case normalization: Every term is normalized to lower case (or upper case).

Stop words removal (filtering): Stop words are those common words that do not add meaningful content to the document. Examples are: a, the, of, and, but, or.

Stemming is the process of reducing the words to their root form (non-changing portion), called a stem, even if the stem is not a valid word in the language.

Lemmatization is the process of converting the words to their root word, called a lemma, which is a valid word in the language.

Stemming is a rule-based approach; it is faster as it chops the end of the word without understanding the context of the word. Lemmatizing is a dictionary-based approach; it is slower but more accurate as it takes context of the word in mind.

Examples:

- ▶ 'Walk', 'walks', 'walking', and 'walked' will be converted to 'walk' by both stemming and lemmatization.
- ▶ 'Browsing' will be converted to 'brows' by stemming but to 'browse' by lemmatization.
- ▶ 'Studies' will be converted to 'studi' by stemming but to 'study' by lemmatization.

Report on International Webinar On Unveiling Unstructured Data

by

Dr.J.C.Miraclin Joyce Pamila,

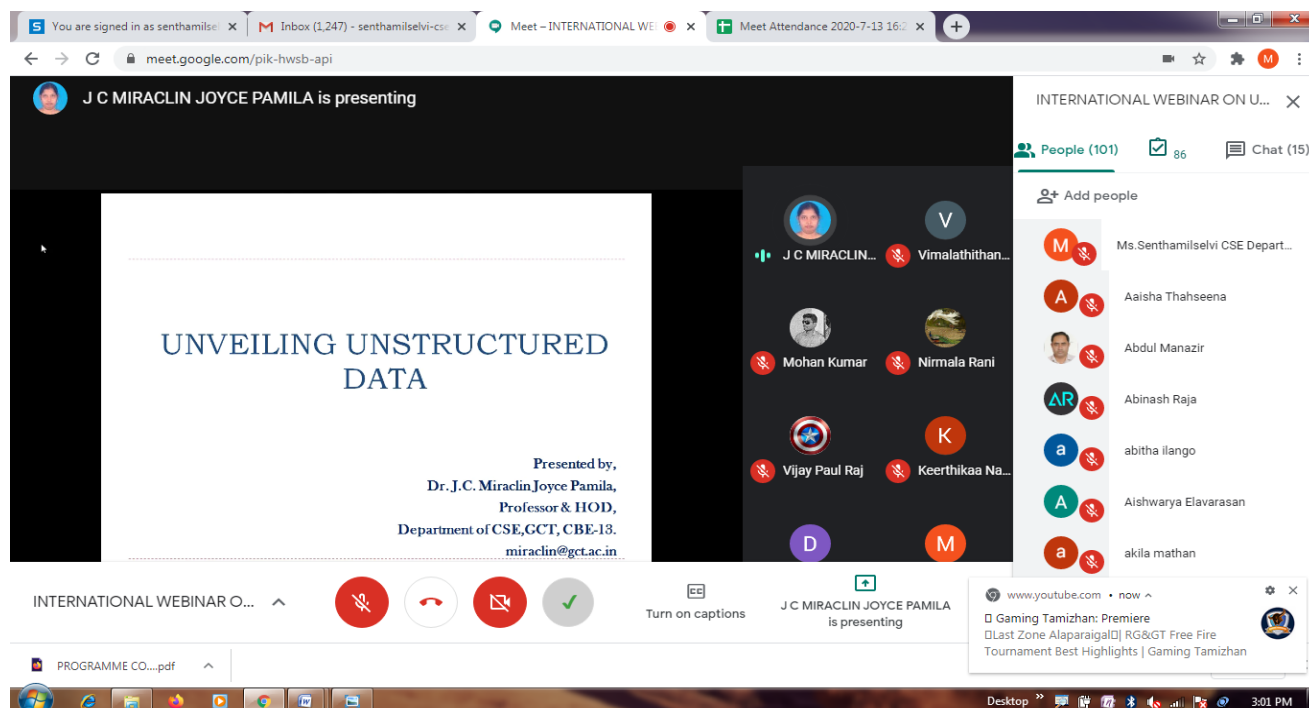

Professor & Head /CSE,

Government college of Technology,Coimbatore.

The Department of CSE conducted an International Webinar on 15.07.2020 between 3:00 p.m and 4:30 p.m. The webinar was convened by Dr.S.A.Sahaaya Arul Mary, HoD/CSE and coordinated by Dr.S.Mohana and Dr.R.Senthamil Selvi.

Dr.J.C.Miraclin Joyce Pamila, Professor & Head /CSE, Government college of Technology, Coimbatore, delivered a talk titled “Unveiling Unstructured Data.” During the session she explained what unstructured data is and how to handle unstructured data which is coming from various kinds of external resources. She also explained the challenges that are faced when one deals with unstructured data in various domains. The session also covered usage of Natural Language tool kit for Natural language processing. She also explained NLTK platform for building python programs to work with human language data.

138 participants from various colleges attended the webinar and gave a positive feedback. Some participants raised their queries in the QA session at the end of the lecture. These doubts were cleared by Dr. J.C.Miraclin Joyce Pamila. Earlier Dr.S.A.Sahaaya Arul Mary welcomed the gathering and Dr.R.Senthamil Selvi concluded the meeting with a vote of thanks.

DEPARTMENT OF COMPUTER SCIENCE AND ENGINEERING

(Accredited by National Board of Accreditation (NBA) & IEI)

A Technical Webinar on “Dimensification of Data using DBMS”

To help the students and faculty enhance their knowledge about Database Management System the Department of Computer Science and Engineering at Saranathan College of Engineering, Trichy organized on **14th July 2020**, Tuesday between **10.00 am** and **11.00 am** a technical webinar titled **“Dimensification of Data using DBMS”**. **Mr. P. Santhiyagu Antony Raj**, Principal Consultant, Financial Oracle Services, Bengaluru presented the session to students, faculty members, research scholars from colleges from different states in India.

He demonstrated various Oracle developer tools and developed the database for a simple application. He also reinforced to the participants the importance of making use of the available free oracle tools. **110** participants participated in the event. The doubt clearing session at the end of the lecture was interactive and lively. Feedback and suggestions were collected from participants through Google Form.

The screenshot displays a Zoom webinar interface. On the left, a window titled 'Oracle SQL Developer: FCCOMP' shows a SQL query in the 'Query Builder' window. The query is: `select lead_server_ip_address, 1 within group (order by middleware_installed), middleware_installed from jpth_application_server group by middleware_installed;`. The 'Query Result' window shows a table with 12 rows and 3 columns: `LISTAGG(SERVER_IP_ADDRESS, 'WITHINGROUP(ORDER BY MIDDLEWARE_INSTALLED) MIDDLEWARE_IN`. On the right, a 'Participants (82)' list is visible, showing names and initials of participants such as R. Mohan Kumar, Rajaratnam Kawshika, RAJESH KANNAN, Rakshanna M P, Ramya, S.DHEERAJ PRAKASH, S.KAREESHINI, S.T.AROKKIYA MARY, sahana parveen, Sakthi Subramaniam, Sanmugi A, and Sanofer Rasheed. At the bottom, there are controls for 'Unmute', 'Start Video', 'Participants', 'Chat', 'Share Screen', 'Record', and a 'Leave' button.

International webinar

On

“Covid’19 Analysis using Machine Learning”

The Department of CSE organised an International Webinar on 14.07.2020 between 10.00 AM and 11.00 AM. The webinar was convened by Dr.S.A.Sahaaya Arul Mary, HoD/CSE and coordinated by Mr.P.B ArunPrasad , Mr.R.Karthik and Ms.K.Mohanappriya.

Dr. G. Suganya, Associate Professor, Department of Computer Science and Engineering, VIT University, Chennai and Assistant Director – S/W Development Cell presented a webinar session on **“COVID’19 - Analysis using Machine Learning”** to the webinar participants. The participants were students, faculty members, research scholars from colleges from different states in India. Totally 101 members have participated in this webinar and which in itself made this event a grand success. The main objective of this webinar was to impart in all participants the basics of machine learning concepts and provide hands-on experience in using covid ’19 datasets thus providing them with an opportunity to enhance their relevant skills and become strong in this technology. The Session started with the Introduction of Machine learning and then on to a comparison between ML & Traditional programming. She went on into explaining the comparison between ML, DL & AI. She also covered about the packages available in python and taught how to explore in Jupyter Notebook. Finally she took the participants on a virtual walk through the analysis using ML methods and covid’19 dataset. Her clarifications of the various doubts raised by the participants made the session more interactive. She expressed her thanks to the management, Principal Sir, HoD/CSE and faculty members for providing her this opportunity through this webinar to be among all these participants from various Institutions.

Report on International Webinar on E-PAYMENTS: A View of Authorisation, Clearing and Settlement

by

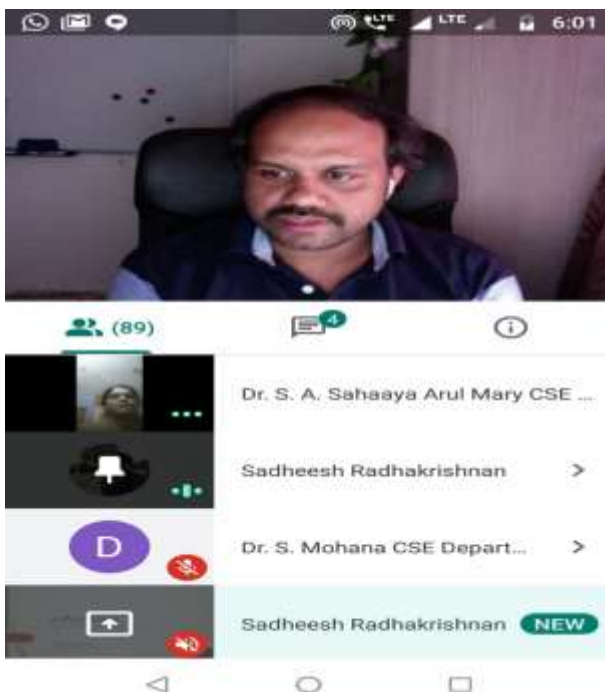

Mr.Sadheesh Radhakrishnan,

Payment cards SME, Worldspay/FIS,London,UK.

The Department of CSE conducted an International Webinar on 13.07.2020 between 6:00 p.m and 7:30 p.m. The webinar was convened by Dr.S.A.Sahaaya Arul Mary, HoD/CSE and coordinated by Dr.S.Mohana and Dr.R.Senthamil Selvi.

Mr.Sadheesh Radhakrishnan, Payment Cards SME,WorldPay/Fis,London-UK delivered a talk titled “ e-payments: A view of Authorization, Clearing and Settlement.” During the session he explained how an e-payment gets authorized, cleared and settled to a merchant. He also explained each step of the process involving an exchange of transaction data and money that must be settled and balanced. The session also covered various types of e-payments and how they differ in their business terms. He also covered the changes involved behind every card transaction that we are make in our everyday life.

128 participants from various colleges attended the webinar and gave a positive feedback. Some participants raised their queries in the QA session at the end of the lecture. These doubts were cleared by Mr Sadheesh. Earlier Dr.S.A.Sahaaya Arul Mary welcomed the gathering and Dr.R.Senthamil Selvi concluded the meeting with a vote of thanks.

**A brief report on an online webinar on “Advances in E-mobility systems”
as part of National Science Day Celebration organized by department of
EEE**

It was planned and proposed to conduct online webinar on “**Advances in E-mobility system**” as part of National Science Day Celebration on 01.03.2021 (10.00AM-11.30AM).

The resource person for this online webinar was Dr.S.Kumaravel, working as Associate Professor in the Department of Electrical Engineering, National Institute of Technology Calicut, Kerala since December 2008. His major areas of research are design and development of DC-DC converters, stability enhancement of microgrid, solid state transformers, etc

The main objective of this online webinar is to inculcate the knowledge on the latest advancements and technical challenges in electric vehicles. Totally 93 students of Second year EEE have benefited by attending this online webinar

The resource person delivered the webinar on the evolution of electric vehicle, recent challenges and technological development in the field of E mobility systems. He also added few notes on smart micro grid

Future of STI- Impacts on Education, Skills & Work

EEE Department, Saranathan College of Engineering, Tiruchirappalli

Presented by

Dr. KUMARAVEL SUNDARAMOORTHY
Department of Electrical Engineering
National Institute of Technology Calicut, Kerala

What is the difference between Science and Engineering/Technology?

- **Science** is the body of knowledge that explores the physical and natural world.
- **Engineering** is the application of knowledge in order to design, build and maintain a product or a process that solves a problem and fulfills a need (i.e. a technology).

First Power Plant in India

Sidrapong Hydro Electric Power Station

The first plant consisted of two 65 kW Crompton-Brunton single-phase, 2300 volts and 83.3 hertz alternators coupled with two Gunther's Turbines. India's first Hydro-Electric Power Station with 2 x 65 kW capacity was commissioned on **10 November 1897** by C. C. Stevens, the then Acting Lieutenant Governor of Bengal.
