■ There will be three types of projects :

■ **Individual Projects:** These projects include brief learning assignments / competitive programming that a student must complete while studying different course modules. For ex. there will be a course project on say React when he/she is studying that topic on our platform.

They will be required to draw up necessary documentation to support their work and make formal presentations of their work. They will be trained in using Version Control

Systems, Project Tracking Systems and Automated Building, Testing & Deployment frameworks in order to simulate professional working conditions.

▪ Students will be offered Internship certificates upon successful completion. Stipend structure will vary depending on the assignments undertaken and the company that rolls out the internship offer.
