

SAY NO TO PLASTICS

What are the initiative
that we can do so that it
helps our environment

- Plastic Bags have become the major part in the way of life. But if we have the will we can start reducing their use in small ways

- Choose goods with minimal packaging, and which are packaged in a material that can be recycled or returned in your area.

- Try to reduce the need to throw away plastics.

- Rather than throwing them away, give plastic toys or containers to children's scrap stores or playgroups for reuse.

- Buy products that are refillable.

- Recycling the Plastic Bags you already have is another good idea.
