

## Minutes of Course committee meeting

SUB: Course committee meeting for the subject Process Control of the even semester of academic year 2021-22 – minutes.

The course committee meeting for the subject Process Control for the even semester of the academic year 2021-22 was held on, 17.08.2021 between 11.00 AM - 11.30 AM at HODs cabin of our Department.

#### Members present:

Name	Designation/ Role	Sign			
Dr.S,M.Girirajkumar	Professor & HOD/ Chairperson	elys o			
Dr.M.Shanmugavalli	Professor / Senior faculty	M Shanngalalle			
Dr. P. Aravind	Assistant Professor/ Course Instructor	Ardi			

- The mission and vision of the institute and department were discussed.
- 2. The PEOs, PSOs and POs of the department were reviewed.
- With reference the R2017 Curriculum, this subject has only 3 credits and has no tutorial.
- This subject will be allotted 4 hours per week.
- Since this is a core subject videos and power point presentations need to be shown to students.
- The nptel lectures available in the sara portal need to be utilized.
- The execution and implementation strategies of the subject for the upcoming even of the academic year 2021-22 were discussed.
- Since in the previous year assessment the outcomes were not reached the course outcomes, co- po mapping and content beyond syllabus to be conducted were discussed and finalized to be the same.
- 9. The teaching methodology for the subjects and units were discussed.
- Bright and average students to be identified and they should be properly motivated and guided to score good marks. Counseling reports to be maintained properly.
- 11. Course material to be circulated to all the students and the same has to be ensured at the beginning of the semester.
- 12. Course logbook and course files will be reviewed periodically by HOD.
- 13. The portions for IA test I is 1.5 units, IA test II is 1.5 units and IA test III is 1.5 units were finalized.
- IA test answer scripts to be duly corrected and given to the students.
- 15. The content beyond syllabus, the course outcomes and the mapping between Course outcomes, Program outcomes and the Program specific outcomes before and after content beyond syllabus were finalized as follows.

### **Course Outcomes**

C303	SUBJECTCODE: E18553	SUBJECT TITLE PROCESS CONTROL
C303.1	Derive the Mathematical mode	of first order level, flow, pressure, temperature process.
C303.2	Outline various final control ele	ements and modelling of pneumatic actuators.
C303.3	Illustrate the effect of various c	ontrol actions.
C303.4	Classify the evaluation criteria	and tuning techniques of controllers.
C303.4 C303.5	Classify the evaluation criteria Elaborate the model based cont	and tuning techniques of controllers.

#### **Course Outcomes**

C202	EE8351 DIGITAL LOGIC CIRCUITS								
C202.1	Describe the various types of number systems, binary codes and examine the digital logic families								
C202.2	Use K map for simplification and implementation of combinational logic circuit.								
C202.3	Explain the synchronous sequential logic circuits and produce a state transition diagram from a description of sequential logic function.								
C202.4	Demonstrate the synchronous sequential circuits and describe the operation of programmable logic devices								
C202.5	Describe the VHDL programming language for logic circuits								
C202.6	Produce VHDL coding for combinational logic and sequential circuits

### Course Outcomes

C403	EI8751 INDUSTRIAL DATA NETWORKS
C403.1	Infer knowledge on the basic concepts of data networks.
C403.2	Define the basics concepts of internetworking and serial communications.
C403.3	Describe the uses of HART and Field buses in process industries.
C403.4	Recognize the importance of MODBUS, PROFIBUS and other communication protocol.
C403.5	Identify the importance and applications of foundation fieldbus
C403.6	Exhibit the concept of industrial Ethernet and wireless communication techniques.

**Course Outcomes** 

C309	IC8651 ADVANCED CONTROL SYSTEM
C309.1	Construct the model of linear and non-linear systems using state variable analysis
C309.2	Design and compute the state feedback control and state observer
C309.3	Examine sample data analysis
C309.4	<ul> <li>Analyze the stability of the systems using different techniques.</li> </ul>
C309.5	Construct phase trajectories for non- linear systems using the phase plane analysis and describing function analysis.
C309.6	Discuss the design of optimal controller.

Mapping of COs with PSOs and POs - before CBS.
