

Management of Saranathan college of Engineering organized COVID-19 Vaccination program for Staff members above 45 years

Saranathan College of Engineering implemented a voluntary COVID -19 vaccination drive during 3rd week of March for our willing and volunteered faculty above 45 years. In order to protect the health of staff members and their families from COVID-19 infection, our management has implemented this policy to maintain a hazard free workplace.

Our college management considered advice from respective hospital management authority in executing this vaccination drive. Our management magnanimously offered COVID-19 vaccine drive for the benefit of SaraFamily. Vaccinations were administered by Shyamala Nursing Home, Cantonment, Trichy.

After vaccination, our management ensures everyone in the college premises should continue to follow all the safety precautions including wearing a mask, maintaining social distance and cleaning hands often. Our management also checks up with vaccinated staff members to see if they have any adverse reactions.

All staff members conveyed their sincere gratitude towards the management to build back better workforce resilience as the pandemic situation continues to evolve. Saranathan College of Engineering has positively influenced vaccination decisions of staff members and serves as a role model in our society.
